FOR IMMEDIATE RELEASE:

PARKER HEALTH GROUP CEO JOINS THE GLOBAL AGEING NETWORK BOARD

(Piscataway, NJ) – Roberto Muñiz, Parker Health Group, Inc. President & CEO joins the Board of Directors of [The Global Ageing Network](#).

The Global Ageing Network is a worldwide organization of service providers, businesses, academics, scholars and others. Its mission is to connect and support care and service providers worldwide in order to enhance quality of life for global aging. Muñiz will work alongside colleagues from around the globe on issues that impact the senior population.

“Some of the challenges of aging are the same worldwide. We are only as strong as our weakest link,” says Muñiz. “True leadership is about sharing knowledge of what works and what doesn’t, so that we can make a difference in people’s quality of life and ensure full access to care and services for seniors across the globe.”

Muñiz believes there is so much to be learned from each other: whether it’s meeting the needs of more people with residential or at home services and programs, making care more affordable for all, or sharing technologies that will better meet the needs of the new generations that will need care.

He was nominated for this new position by [LeadingAge](#) National, another not-for-profit organization comprised of 6,000+ members and partners, committed to solving the challenges of aging and being a trusted voice for seniors.

About Parker Health Group, Inc.

Parker Health Group, Inc. is a non-for-profit, New Jersey-based aging services organization with over 112 years’ experience that is committed to empowering older Americans. Since 1907 Parker has been challenging, changing, and expanding the idea of what it means to grow older in America and how all of us can make aging part of life.
